

The International Myeloma Foundation (IMF) is very excited to announce our biggest upcoming project. Planned for summer 2007, the MYELOMA MOBILE is set to travel across the United States to educate and empower patients and their families and to raise awareness about myeloma in local communities across America. The MYELOMA MOBILE is the brainchild of Michael Tuohy of Prospect, CT, who was diagnosed with myeloma when he was just 36 years old. Michael will be traveling with his wife, Robin, and their two children, 14-year-old Ally and 9-year-old Mikey.

“When I was diagnosed I never thought I’d live to celebrate my 40th birthday, but here I am, seven years past diagnosis, in full remission and feeling good,” said Michael Tuohy. “I thought of the MYELOMA MOBILE project as a way to reach out to patients and their families who had never heard of myeloma before their diagnosis, and to help those who do not have good medical resources to work their way through the many treatment options available today. Facing myeloma can be daunting if you’re doing it alone, and we want to be there to help.”

The route for the MYELOMA MOBILE has been finalized. We will be holding events at major cancer centers across the country, including the one shown below. Activities will include informative discussions with local myeloma experts on treatment options and experiences, including a Q&A session. Educational materials and refreshments will be available. Please join us.

## **The Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins Thursday, August 9th, 2007 at 10AM**

*Location:* David H. Koch Cancer Research Building, Owens Auditorium  
1550 Orleans Street, Baltimore, MD, 21231

*Parking:* McElderry Street Garage (Outpatient Center)  
between Jefferson and McElderry Streets at Caroline Street

*Visit our website at [www.myeloma.org](http://www.myeloma.org) for complete listing of locations and additional information on this project.*
